

The 2017 IFL Champion is looking towards another competitive season, ending with another playoff run. The team will be competitive on offense. However, will the defensive line and secondary pull the LB corps through the season?

Kareem Jackson – 100%
DRC – 54%
Jaquiski Tarrt – 72%
Johnathan Cyprien – 45%

2018 Potential Formations –

- **Offense.** To start the season, **Spread** (Gordon, Collins, Allen, Evans, Anderson) might be used until the production is seen from Johnson/Michel. Once they emerge, a switch to **Power I** (Gordon, Collins, Johnson/Michel, Allen, Evans) could take over.
- **Defense.** With Tarrt, Jackson, and Simmons at safety, **3-5-3 (3 Deep)** might be used more often in 2018. Especially with the unknown production at LB.

Key Position Battles –

- **Defensive End Depth.** Bosa and Jones are weekly starters for the Colts. Only thing to figure out is, who can start in their place on bye weeks? As of now, **Noah Spence** hasn't been producing for the Bucs, even with the added weight.
- **Linebacker Production.** The Colts will be feeling better if **Navarro Bowman** lands a job. Aside from the Cleveland tag-team of **Schobert & Collins, Alexander/Carter/Correa** might be fill-ins.

Potential Contributors –

- **Rashaan Evans.** Evans needs to regain health to get back on the playing field and start gaining experience. The Titans are desperate for his return.
- **Ja'Whaun Bentley.** Bentley has been playing well through the pre-season. He should see snaps at some point for a position that is consistently injured in New England (NFL).
- **Ian Thomas.** Greg Olsen is still the man in Carolina. However, **Thomas** has produced well during the pre-season and displays the athleticism to be a solid contributor for years to come.

Injury Recoverability –

- The **Marquise Lee** injury might force the playing time of **Kerryon Johnson** or **Sony Michel**. Fortunately, if the Colts lose one of their key players (Gordon, Collins, Allen, or Evans), they have plenty of future picks that could be used to acquire additional talent this season. The picks could also be used to acquire another productive LB...

The Texans will try to repeat as Division Champion. However, the competition will be tougher this season. The key will be if the right players are started each week. The team was 80.5% efficient at playing the correct lineup; placing 12th in the AFC for lineup efficiency (2017).

2018 Potential Formations –

- **Offense. Full T** (McCoy, Gore, Carson/Riddick/Barber, Olsen, Meredith/Amendola) or **Full House** (McCoy, Gore, Carson/Riddick/Barber, Olsen, Clay) are solid options to emphasize their running game.
- **Defense.** The Texans continue to use the **3-4** based on the LB corps.

Key Position Battles –

- **Starting Running Backs.** Obviously, **Shady** will start if he's not suspended. After that, a competition of **Frank Gore**, **Chris Carson**, and **Peyton Barber** will ensue for the other two spots.
- **5th Offensive Starter.** Any given week, the fifth spot could be awarded to **Charles Clay**, **Cameron Meredith**, or **Danny Amendola**.
- **Starting Safety Opposite Quinn.** If **Earl Thomas** doesn't return, and the hamstring injury lingers for **Tandy**, what will **Darian Thompson** be able to provide? The Texans might need to find another option.

Potential Contributors –

- **Antonio Callaway.** There's been a lot of buzz around **Callaway** this pre-season. However, plenty of off the field concerns still exist for him. Josh Gordon 2.0?
- **Cameron Meredith.** It's still unknown if **Cameron** will be fully recovered this season. If he's able to stay on the playing field, he could rack up points working with Brees.
- **John Kelly.** **Kelly** is making a strong push to be the backup behind Gurley. If he obtains it, it's a great player to hold in case of an injury or if he spells Gurley to keep him fresh.

Injury/Suspension Recoverability –

- **Gore's** production is still unknown this season in Miami. Who knows if Tannehill will take enough pressure off of the run defense for **Gore** to excel. Plus, what's the split between him and Drake? **Carson** and **Barber** stepping up this season does alleviate some pressure if **McCoy** is suspended though.

2018 should be a fun year for the Jags! A few new pieces were brought in to bolster the offense. The defense will be led by Mosley and Wright.

2018 Potential Formations –

- **Offense.** The Jags have options on offense. **Power I** (Coleman, Hyde, CMC, Landry/Cooks/Ju-Ju) or **Spread** (Coleman/Hyde/CMC, Landry, Cooks, Ju-Ju).
- **Defense.** 3-4 has been the only formation the Jags have used the last two years. However, I don't foresee that happening in 2018. **3-5-3 (3 Deep)** will place the Jags best players on the field.

Key Position Battles –

- **Linebacker Depth.** The Jags might look to acquire some talent behind **Mosley, Wright, and Bucannon.**
- **Defensive End Depth.** **Heyward** and **Brockers** will get the start week 1. The team needs **Davenport** or **Hubbard** to develop to ease the bye-week pain.

Potential Contributors –

- **Kenny Golladay.** Kenny is running wild in the 3WR sets in Detroit (NFL). If he gains consistency, he could be a nice complimentary player to the starting offense.
- **Sam Hubbard.** **Sam** has shown his potential in the pre-season. The only one that stands in his way is Marvin Lewis.
- **Chase Edmonds.** **Chase** locked up the RB2 spot in Arizona (NFL). How much they rest David Johnson will determine **Edmonds'** production.
- **Marlon Mack.** If **Mack** is able to become healthy again, he has a shot at producing in an unknown Indy backfield. Luckily for the Jags, they have **Jordan Wilkins** waiting for an opportunity if **Mack** falters.

Injury Recoverability –

- The Jaguars have options and depth on offense. The wrench in the plan is when the defense takes hits. The team is lacking early picks in 2019. However, has the standard set of picks in 2020.

Could the Titans be the Comeback Team of 2018? A rebuilt offense. Depth on defense. Signs are easily pointing upward. Injuries to the core offense could easily corrupt that dream though.

2018 Potential Formations –

- **Offense. Full T** (Cook, Johnson, McKinnon, Ertz, Goodwin/Lockett) will be great if Jerick is healthy to start the season. If McKinnon is still hurt, **Pro Set** (Cook, Johnson, Ertz, Goodwin, Lockett) will be in play.
- **Defense.** Based on the LBs corps, the use of the **3-4** formation will continue in 2018.

Key Position Battles –

- **Starting Linebackers.** The Titans possess depth at the LB spot; a *terrible* problem to have. Will the right players be started each week?
- **2nd Starting Defensive End.** My guess is Jason will play the hot hand between **Leonard Williams** and **Shaq Lawson**. Whomever it is will start opposite of **Ngakoue**.
- **Safety Depth.** Like at Linebacker, the Titans possess depth at safety.

Potential Contributors –

- **Robert Turbin.** Suspended for the first four games of the season, the 6th year player has as good as shot as anyone to produce out of the Indy backfield.
- **Davon Godchaux.** Godchaux looks to become a producer on that Miami (NFL) DLine. However, the Titans will be rolling out Snacks so it will be difficult for Godchaux to see the field.
- **Blake Jarwin.** Starting TE is up for grabs in DAL (NFL).

Injury Recoverability –

- The Titans have depth at linebacker and safety. I'd say, more pieces could be moved on defense than offense. The team has two firsts in 2019 that could also be used, as needed. If any of the core starters (Cook, DJ, McKinnon, Ertz) get injured, the Titans will need to look into alternative solutions to fill the void as there isn't a solid replacement on the roster right now.

AFC SOUTH POINT LEADERS FOR 2016 & 2017 SEASONS

- Division rankings for Total points are:
 - Tennessee (7,231)
 - Indianapolis (7,024)
 - Houston (6,881)
 - Jacksonville (6,871)
- Division rankings for Offensive points are:
 - Houston (3,549)
 - Indianapolis (3,530)
 - Tennessee (3,481)
 - Jacksonville (3,440)
- Division rankings for Defensive points are:
 - Tennessee (3,750)
 - Indianapolis (3,493)
 - Jacksonville (3,431)
 - Houston (3,332)

Note – The above rankings were based combined points scored from 2016 & 2017 IFL's regular seasons (weeks 1-12)
